

# Weekly Newsletter

From the City Administrator

Dear Tool,

I hope you had a Happy Thanksgiving and I am looking forward to continued cheer through the holidays.

The City of Tool has been recognized as one of 12 communities to move on and compete in the National Renewable Energy Laboratory's SolarAPP+ Prize program. SolarAPP+ is an online platform that can instantly issue permits for compliant residential rooftop photovoltaic (PV) systems. If the city were to adopt the SolarAPP+ within the second step of the process, it will receive \$15,000. It is estimated that communities that adopt the program have their projects installed in about two weeks.

If you have not met him already, our newest employee, Chief of Police Robert Walker just began his second week on the job. Walker hopes to bring on members to his staff to help strengthen our police force by the end of the next week.

Lastly, Tool's newest business, Gab's Sandwich Shop is now open for business! The sandwich shop is located at 906 S. Tool Dr. Suite A. Stop in and invite all that you know!

Tool, Together.

Sincerely,

Julius Kizzee  
City Administrator
