

Weekly Newsletter

From the City Administrator

Dear Tool,

I wanted to give everyone a heads up on the upcoming renovations over at the Oran White Civic Center. In February-March, Staff and City Council are hoping to improve the painting and overall image of the Civic Center through a request for proposals for bathroom renovations, exterior painting and other things to beautify the space.

If you are planning on having an event in the Civic Center during that timeframe, it will have to be rescheduled. If you have any questions as always, please call City Hall with more information at 903.432.3522 ext. 106.

I also wanted to highlight our staff this week. We really have a great staff that tries their best and does the best job that they can. It's not often that you have a wonderful environment to come to every day at work. But I can truly say that I truly love to come to work.

From my standpoint, every one of our staff members is respected, hard-working and diligent in their duties to help not only to further their careers, but also to ultimately help the community.

If you're out and about and you see one of our staff members, tell them hello! You just might brighten up their day.

Tool, Together.

Sincerely,

Julius Kizze
City Administrator
